

Summer School

Online Edition

Start making plans for this summer!

If you're interested in further developing your passion for business and economics, apply to take part in our first online learning experience on leading-edge subjects. You will be taught by Bocconi University faculty members and attend virtual classes with top students that share your interests.

Bocconi Summer School is going online, offering a challenging study program open to motivated students. It's a unique opportunity to participate in an exciting laboratory of teaching and active learning.

Advanced Teaching with Outstanding Faculty

Courses are held through an innovative multimedia platform, with teaching materials and tools available to you online at any time and taught by Bocconi's outstanding faculty. To keep you anchored to the real world, each course curriculum includes teamwork on real-life business cases and situations, putting to the test your problem-solving and soft skills and creativity.

Develop Digital Skills

By taking classes online in a highly developed academic environment, your digital skills will get an upgrade. Moreover, you will be able to remotely socialize with and learn from carefully selected bright and dynamic young people with a lot of talent to share.

A Focus on Flexibility

The online edition allows you to personalize your schedule and study in a flexible program: you can join streaming classes and get the best of interaction with professors and classmates or watch (and rewatch!) asynchronous lectures to deepen your understanding and focus on specific topics.

Build Your Network

You'll have the chance to get to know students from around the world and learn to work with peers from different countries and cultures: you can get a (virtual) taste of the multicultural and international environment that is one of the key features of our community.

Enjoy the Bocconi Challenge

Our summer program is a challenge:

- to get a taste of our University
- to learn more about our fields of study
- to experience our innovative teaching methods
- to test yourself in different subjects
- to boost your skill set

And if you become a Bocconi student, you'll learn that challenge is in our DNA.
